Service Interruptions:

Riverside County, Wireless Service Outage

On 11/17/17 at 0207 hours, the CSWC was notified by the Cal OES 911 Branch of a wireless service outage in Riverside County.

- Landlines are not impacted.
- The outage may have been caused by emergency replacement of equipment by Southern California Edison and may take 600 minutes/10 hours to complete the repairs.
- Indio Police Department, Palm Springs Police Department, and CHP Indio have all reported callers having service issues.
- As of 0236 hours, CUEA contacted Southern California Edison who reported repairs are due to a wind event, no ETA for restoral was given.
- As of 0242 hours, CUEA provided an update that the grid had been reset, however there still seemed to be an issue with wireless service. The issue may be unrelated to the Southern California Edison issue.
- Cal OES 911 Branch is monitoring the situation and will provide updates.
- The CSWC will provide updates as they are available.

Remote/Community Isolations:

- None Reported

WEATHER OF CONCERN

Weather of Concern

- Snow levels will begin dropping to pass levels this evening. The transition from rain to snow can make mountain roads extremely slick causing hazardous driving conditions.

WEATHER SYNOPSIS BY REGION

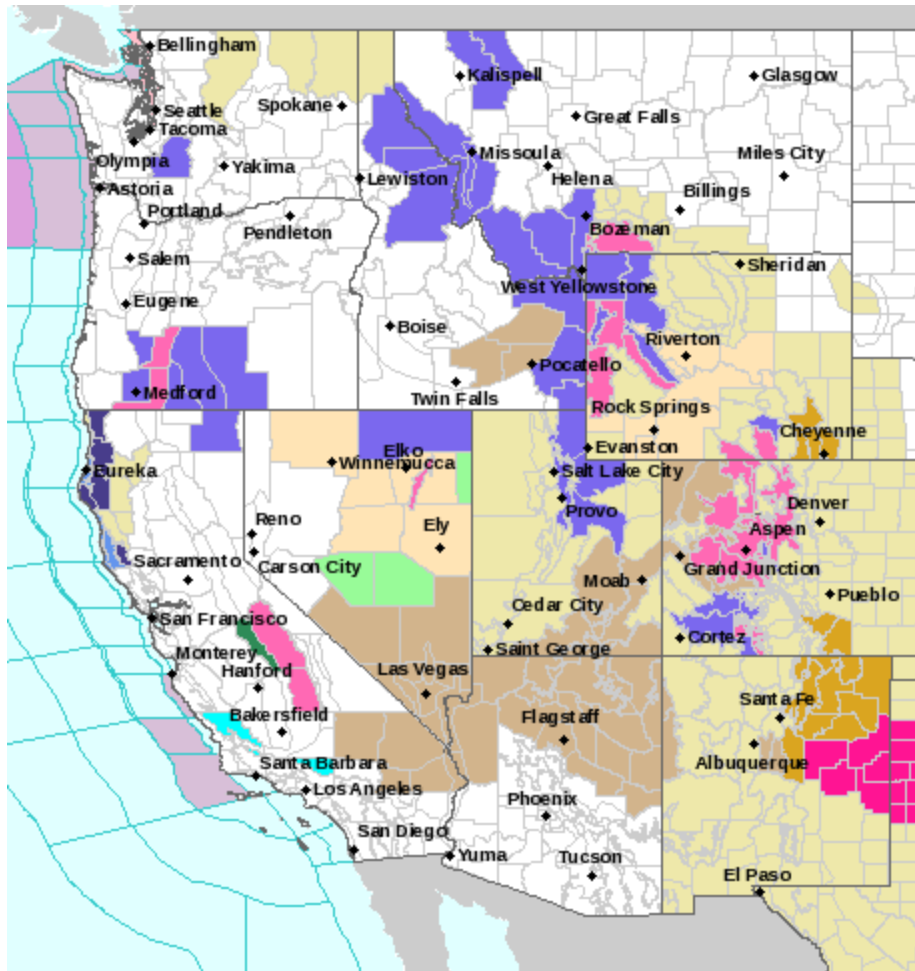

NORTHERN CALIFORNIA

Due to atmospheric ridging, a dry forecast is in store Friday and Saturday. Temperatures will also rebound to near normal levels on Saturday. Light to moderate N to NE wind on Friday will give way to light and variable winds on Saturday. A weaker Pacific trough will approach late Sunday and induce a strengthening southerly flow across the region. Temperatures will climb to above normal status while also raising moisture levels in the atmosphere. A chance of primarily rain showers would be found across the northern third or so of the region. Next week could prove to be a transitional pattern change from the cool-damp weather, previously experienced the past 2 weeks, to a drier-warmer period with weaker Pacific disturbances impacting northern portions of the region. Too early to tell since the models have been flip flopping, thus confidence is low for much of next week.

SOUTHERN CALIFORNIA

A storm centered over the Pacific Northwest will bring a period of rain to Central California through Friday morning. Heavy rain continues over the Central Sierra this morning with an additional 2 to 4 inches of rainfall through Friday morning. 1 to 2 inches of rainfall will occur along the Big Sur Coast and trail off to less than a quarter inch of rainfall over Santa Barbara County. Little or no rainfall is expected across Southern California from this storm. Westerly winds of 20 to 30 mph with gusts to 50 mph will continue over windy mountain, desert, and Central Coast locations through Friday afternoon. Temperatures will cool 5 to 10 degrees Friday as the storm moves to the east. Zonal flow will bring a little above normal temperatures Saturday through Monday. Local northeast winds of 15 to 25 mph with gusts to 40 mph will surface across the Los Angeles County Mountains Saturday morning. Another storm moving into the Pacific Northwest will bring scattered showers with light rainfall accumulations to Central California Sunday night through Monday night. Above normal temperatures and low humidity will occur Tuesday and Wednesday as high pressure over Mexico expands northward into Southern California.
